

【TECO JSDL2 Server Granted Technology Innovation Product Award】

Taian Electric Co., Ltd., a subsidiary of TECO Group, was granted innovation technology product award for its JSDL2 server during CMCD & CDDIA, an annual forum on smart manufacturing, motion control, and direct drive technologies, held in Shenzhen on Dec. 17.

JSDL2 features high-tier servo JSDG2S twin-core control architecture, high-performance FPGA current loop algorithm, and low cost at high quality, thanks to the application of robotic welding and automated testing equipment, enabling it to receive very good reception since rollout. The product was awarded the honor in the field of motion control.

The honor is in line with the effort of TECO Group in the field of Industry 4.0 in recent years, for which it has invested substantial amount of R&D resources, in order to launch user-friendly automated products.
