

Director Cheng-Tsung Huang graduated from the Department of Economics at Fu Jen Catholic University. He currently serves as Chairman of Sen Yeh Construction Co., Ltd. and Independent Director of AuroteK Corporation (6215.TW).

He previously held positions such as Chairman of the Taipei Importers and Exporters Association (2012–2018) and Chairman of the Taiwan Corporate Sustainability Development Association (2015–2021). With over 30 years of experience in managing electromechanical equipment, construction engineering, and railway engineering, he has led teams in undertaking major transportation infrastructure and international engineering projects, while also promoting urban renewal and infrastructure development.

Since joining TECO's Board of Directors in 1991, he has actively participated in decisions related to business strategy, asset management, and overseas market expansion. He has provided professional advice on budget management, capital allocation, and financial decision-making, strengthening the board's governance capabilities in managing transformation costs and capital utilization. Additionally, he has contributed to ESG strategic planning and implementation, advancing the company's long-term development in green engineering and low-carbon initiatives.
