

Director Jong-Chin Shen holds a Master's degree from the Graduate Institute of Business Automation and Management at National Taipei University of Technology, as well as an honorary Doctorate in Engineering. He currently serves as Senior Advisor to the Office of the President (ROC), Vice Chairman of KGI Financial Holding Co., Ltd. (2883.TW), and Independent Director of Gudeng Precision Industrial Co., Ltd. (3680.TW). He brings extensive experience in both government policymaking and corporate management.

He previously held key positions, including Vice Premier and Chief Information Security Officer of the Executive Yuan (2020), and Minister of Economic Affairs (2017), where he led Taiwan's industrial and energy transformation, laying the foundation for advanced manufacturing, semiconductor process innovation, high-tech R&D, and green energy development. In the area of risk management, he led the National Financial Stabilization Fund and price stabilization mechanisms, responding to major domestic and international events and market fluctuations to maintain capital and financial market stability. In cybersecurity, he elevated information security to the level of national security, promoted industrial development, and helped establish a comprehensive ecosystem.

Since joining TECO's Board of Directors in 2024, he has provided strategic advice in key areas of public utility, including energy storage, virtual power plants, and smart grids. He has promoted the development of energy-saving products, expansion of strategic partnerships, and cultivation of professional talent. He also assisted the company in successfully implementing the government's carbon management pilot program, supporting deep energy conservation and green transformation, and strengthening low-carbon competitiveness and sustainable development.
