

Vice Chairman Su-Chiu (Pamela) Wu graduated from National Chengchi University with a degree in Finance. She also holds a Master's degree in Financial Management from Syracuse University, USA, and an Executive MBA from INSEAD, France.

She has extensive experience in financial management and strategic planning. While serving as General Manager of Jiayuan Investment Co., Ltd. and Chief Strategy Officer of PJ Asset Management, she managed investments in various ESG sustainability infrastructure projects. She also served as Senior Financial Advisor at Siris Capital Group, a private equity firm in New York, and as Chief Financial Officer of Grand Commercial Bank (predecessor of KGI Bank), where she was responsible for financial strategy formulation and execution, financial management, investor relations, investment and M&A decisions, as well as risk and operations management.

As a Director of Yeong Guan Energy Technology Group Co., Ltd. (1589.TW, 2022-2024), she gained deep familiarity with renewable energy policies and industry governance. Yeong Gua is a leading global supplier of green castings for wind turbines, injection molding machines, machine tools, and industrial machinery.

Since becoming Vice Chairman of TECO in 2024, she has leveraged her rich international experience and leadership to optimize operational management, risk control, and ESG information disclosure. She actively promotes green transformation, deepens the global deployment of energy-saving and carbon-reduction initiatives, and aligns business development with the AI data center strategy, leading the company toward continuous growth and enhancing TECO's core competitiveness.
